Introduction

# AI and society

- AI and hype
- Limitations of AI

- Bias

AI and Ethics

- Adversarial attacks

- AI, developing economies, and jobs
- Conclusion

deeplearning.ai

# AI and Society

---

A realistic view of AI

# Goldilocks rule for AI

- Too optimistic: AI will solve all of humanity's problems and create utopia
- Too pessimistic: Super intelligent/sentient killer AI can lead to human extinction
- Just right: AI is a powerful tool, but has limitations. We can mitigate its potential harms and use it to create tremendous value.

# Limitations of AI

- Performance limitations
- Explainability is hard (but sometimes doable)

Right-sided  
Pneumothorax  
(collapsed lung)

[Rajpurkar et al. (2018). CheXNet: Radiologist-Level Pneumonia Detection on Chest X-Rays with Deep Learning.]

[Wang et al. (2017). ChestX-ray8: Hospital-scale Chest X-ray Database and Benchmarks on Weakly-Supervised Classification and Localization of Common Thorax Diseases. IEEE CVPR]

[Images source: NIH Clinical Center Image dataset: <https://nihcc.app.box.com/v/ChestXray-NIHCC>]

# Limitations of AI

- Biased AI through biased data
- Adversarial attacks on AI

deeplearning.ai

# AI and Society

---

Discrimination / Bias

# AI learning unhealthy stereotypes

- **Man** : **Woman** as **Father** : **Mother**
- **Man** : **Woman** as **King** : **Queen**
- Man : Computer programmer as Woman : Homemaker

Man: (1,1)

Computer programmer: (3,2)

Woman: (2,3)

Homemaker: (4,4)

Bolukbasi et al. (2016). Man is to Computer Programmer as Woman is to Homemaker? Debiasing Word Embeddings.

# Why bias matters

- Hiring tool that discriminated against women
- Facial recognition matching dark skinned individuals to criminal mugshots
- Bank loan approvals
- Toxic effect of reinforcing unhealthy stereotypes

# Combating bias

- Technical solutions:
  - E.g., “zero out” the bias in words
  - Use less biased and/or more inclusive data
- Transparency and/or auditing processes
- Diverse workforce
  - Creates less biased applications

Adversarial attacks  
on AI

# Adversarial attacks on AI

Hummingbird

Minor perturbation →

Hammer

Hare

Minor perturbation →

Desk

# Physical attacks

“Milla Jovovich”

Fails to see stop sign

Banana

# Physical attacks

[Sharif et al. (2016). Accessorize to a Crime: Real and Stealthy Attacks on State-of-the-Art Face Recognition.]

[Eykholt et al. (2018). Physical Adversarial Examples for Object Detectors.]

[Brown et al. (2018). Adversarial Patch.]

# Adversarial defenses

- Defenses do exist, but incur some cost
- Similar to spam vs. anti-spam, we may be in an arms race for some applications

deeplearning.ai

Andrew Ng

# AI and Society

---

Adverse uses of AI

# Adverse uses of AI

- DeepFakes
  - Synthesize video of people doing things they never did
- Undermining of democracy and privacy
  - Oppressive monitoring of individuals
- Generating fake comments
- Spam vs. anti-spam and fraud vs. anti-fraud

deeplearning.ai

Andrew Ng

# AI and Society

---

AI and developing economies

# Developing economies

“leapfrog”

- Mobile phones

- Mobile payments

- Online education

# How developing economies can build AI

- The US, China, UK, Canada, and many others have vibrant AI communities. But all countries still have a lot of development ahead
- Focus on AI to strengthen a country's vertical industries
- Public-private partnerships to accelerate development

---

AI and jobs

# AI's impact on jobs worldwide

Jobs replaced  
by 2030

**400-800** mil

Jobs created  
by 2030

**555-890** mil

[Source: McKinsey Global Institute.]

# AI's impact on jobs worldwide

Figure adapted from “The Economic potential of generative AI: The next productivity frontier”, McKinsey Digital, June 2023

# Some solutions

- Conditional basic income: provide a safety net but incentivize learning
- Lifelong learning
- Political solutions

deeplearning.ai

# AI for Everyone

---

## Conclusion

# What you've learned

- What is AI?
- Building AI projects
- Building AI in your company
- AI and society

Keep learning!

- Online courses, books, blogs, ...
